

Nylon Web Cargo Nets

Web Cargo Nets are considerably more flexible, lightweight and compact than wire or rope nets. These nets are made of a durable 1-3/4" nylon webbing with an anti-static finish. Net sizes are listed below and come with a 6.25" mesh opening. All nets are rated with a 4,500 lb. lifting capacity with a 5 to 1 break strength design factor, always having the customer's safety in mind.

Commercial nets are made with either 5/8" galvanized pear shaped links or 1" polypropylene rope beackets (as seen on the picture above) in each corner.

Here at Arabi Sling we also fabricate Military Specification Cargo Nets, manufactured to Department of Defense specification- MIL-S-18313G

SIZE	COMERICAL NET PART #	MILITARY NET PART #	WEIGHT APPROX (LBS)
